

EXPEDITIONARY COMMUNICATIONS

Robust system combining voice, data and radio interoperability for use in harsh conditions.

PROUDLY BUILT IN CANADA

**BCC-TACTICAL
NetVIPR**

**ENHANCED
INTEROPERABILITY**

The BCC-TACTICAL NetVIPR is frequency and radio agnostic, acting as a cross-band, cross-platform and cross-encryption gateway.

The integrated NetVIPR software provides routing and network management capability. Platform and hardware agnostic, it enables Information Advantage across all domains (air, land, sea, cyber and space).

Physical separation of Red and Black networks with enhanced WAN management.

KEY FEATURES:

Connect up to 5 radio networks & create 4 radio talk groups

Compatible with all military and commercial radios, ciphertext and plaintext radios

Link each radio talkgroup to a SIP extension

Keylock switch to isolate the Interoperability Board from SIP or SIP & LAN

WAN, LAN, and VPN connectivity

Red / Black Wide Area Communications

5-minute boot time

Resilient to hard shutdowns

Satellite Ready

Virtual Conference Rooms with classification levels

All Base Camp Connect systems can be customized. The information contained in this technical sheet is based on a standard configuration and serves for informational purpose only.
